## Questions

1. $P_{1} V_{1}=P_{2} V_{2}$
2. 9 atm
3. $\mathrm{V}_{1} / \mathrm{T}_{1}=\mathrm{V}_{2} / \mathrm{T}_{2}$
4. 6.26 L
5. $P_{1} V_{1} / T_{1}=P_{2} V_{2} / T_{2}$
6. $\quad 1.74 \mathrm{~L}$
7. 0.64 moles $\rightarrow 2.56 \mathrm{~g}$

## Theoretical Questions

I.
D

2.

3. .

4. Increasing the pressure will allow a higher cooking temperature. At high altitudes, where pressure is lower, cooking temperatures will be lower as pressure and temperature have a directly proportional relationship.

## Bonus Questions

I. 4.66 atm
2. 116.47 L
3. 52.2 I L

## Solutions to the problems

1. $\mathrm{T}_{1}=182.9 \mathrm{~K} ; \mathrm{V}_{2}=30 \mathrm{~L}$
2. $n=2.3 \mathrm{~mol}$. $1.4 \times 10^{23}$ molecules (the answer in the previous sheet was
incorrect)
3. 22.4 L
4. I atm
5. a) 24.4 K, b) 2.08 L, c) 2.45 atm , d) 250 K
6. 0.85 g
7. 0.05 atm and 488 K
8. $1.96 \mathrm{~g} / \mathrm{L}$
9. $28 \mathrm{~g} / \mathrm{mol}$
